LOWPRO 23/05 ROAD PLATE

HS20-44 certified heavy duty modular trench cover for roads and sidewalks.

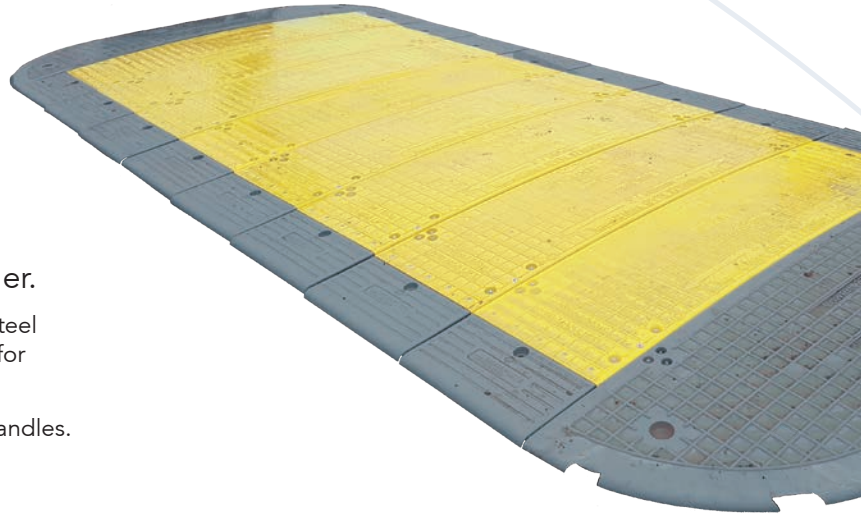

The Lowpro 23/05 Road Plate is a modular system of composite sections that link together.

The Lowpro 23/05 Road Plate is the ideal substitute to the steel plate, giving you more safety & versatility. There is no need for specialized lift equipment.

Installation takes a fraction of the time when using EasiLift handles.

Benefits

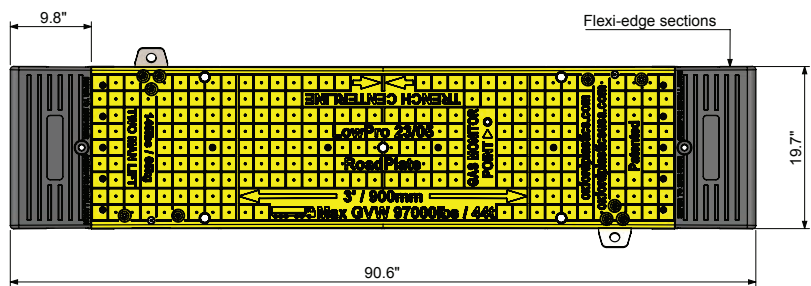

- Modular Road Plate System is a safer & cost effective alternative to steel plates.
- Innovative & patented Flexi-Edge greatly reduces noise pollution, and eliminates cold patch ramping around edges.
- Inbuilt steel linking pins interlock plates together.
- HS20-44 certified for up to 3' wide trench, suitable for 97,000 lb. vehicle traffic.
- Suitable for pedestrian traffic, with up to a 4' wide trench.
- Each section weighs 145 lbs & can be installed in minutes with a 2 person lift.
- Molded anti-slip surface provides safer pedestrian access.
- Hi-visibility yellow encourages traffic calming.
- Underside steel drop pins increase lateral stability.
- Please adhere to local DOT legislation, as this may affect the maximum trench width

TECHNICAL SPECIFICATION

LOWPRO 23/05 ROAD PLATE

Product No 0839
Length, end to end 90.6"
Width 19.7"
Weight 145 lbs
Number/pallet 16
Color Yellow & gray as standard

LOW PRO 23/05 END PLATE

Product No 0726
Length, end to end 90.6"
Width 27.6"
Weight 66 lbs
Number/pallet 16
Color Gray as standard
