## FODS MATS OFFER SUPERIOR BENEFITS:

- Creates an instant construction entrance over virtually any type of surface including asphalt, concrete, turf, sand, mud, even ground, uneven ground, and similar
- Will not get clogged, be an eyesore, become embedded in soft ground
- Protects ground when placed on top of surface unlike conventional SCE's (Stabilized Construction Entrance)
- Easily transported from site to site
- Creates an easily recognizable entrance for vehicles to see day or night
- Superior alternative to rocks, shakers, steel plates
- Supports weights up to 80 tons
- Chemically resistant to acids, oils, break fluid, etc.
- Easily cleaned and put back in service within minutes
- Made in the USA
- Easily stored when not being used
- 15 times more abrasion resistant than steel
- Years of reusable performance
- 100% recyclable

# FODS IS YOUR ENVIRONMENTAL SOLUTION

Ideal for construction, airports, government, military, mining, agriculture, forestry, renewable energy, oil and gas, telecommunications, national parks, storm water, roads and bridges.

	FODS	ROCKS	
Becomes Clogged	No	Yes	
100% Solid and uniform construction	Yes	No	
Recyclable	Yes	No	
Easily Cleaned	Yes	No	
Reusable/Transportable	Yes	No	
Absorbs chemicals and oils	No	Yes	
Protects ground underneath	Yes	No	
Supports 60,000 PSF	Yes	Yes	
Easily seen from street	Yes	No	
Made in USA	Yes	Yes	
Spans over uneven ground	Yes	Yes	
Disturbs ground when installed	No	Yes	
Shakes vehicles when crossing over	Yes	No	

FODS mats are 100% recyclable, made in the USA, and can be reused for many years. Once cleaned off they do not transport contaminants to other sites. Mountainsides and hillsides are saved from being blasted from rock. FODS mats at end of use will not end up in landfills like rocks and similar methods. The ground is undisturbed while mats are being used, keeping soils in place from erosion. Each entrance installed with FODS will save 3 dump trucks worth of rock on initial install.

Ideal for construction, airports, government, military, oil and gas, roads and bridges, renewable energy, telecommunications, national parks, storm water, pipeline, utilities, mining, agriculture and more.

# FODS TRACKOUT CONTROL

## FODS MAT

- Mat size is 12' wide by 7' long and pyramids are 3" tall
- Mats are connected together using hardware to achieve the required size to meet local jurisdictions specifications
- Mats weigh approx. 430 lbs.
- Mats can be anchored to asphalt, concrete, or directly to the dirt substrate
- Mats are made out of HMWPE (High Molecular Weight Polyethylene)
- Mats are FODS Yellow in Color

## STABILIZED CONSTRUCTION ENTRANCE (SCE)

12' wide by 70' long of appropriate aggregate. Location where SCE is to be located needs to be excavated 6" down in depth, a geotextile erosion control fabric placed down, with aggregate placed on top.

Individual jurisdictions have specifications that they require which can increase or decrease depth, width, length, size of aggregate, and similar. After SCE removal, topsoil must be added back to disturbed area, graded and re-seeded.
